Computer Science & Engineering graduate specializing in developing full-stack applications using **Java, Spring Boot, Thymeleaf and MySQL**. Experienced in object-oriented programming, requirements analysis, UML modeling, software testing with **JUnit and Mockito**, and version control with Git/GitHub. Additional background in **machine learning** and **robotics** through academic projects and research.

Education

Integrated Master (MSc) in Computer Science & Engineering 09/2018 – 02/2025 | University of Ioannina
Department of Computer Science & Engineering

- Thesis: Robot Navigation in Presence of People

Academic Projects & Research

Full Stack Web Application Deployment

- Designed and developed full-stack software applications using Spring Boot (backend) and Thymeleaf (frontend).
- Performed requirements analysis and translated functional requirements into technical solutions using UML modeling (Sequence and Robustness diagrams).
- Implemented and tested application features, ensuring reliability and performance (JUnit and Mockito).
- Designed and managed relational data using MySQL and supported integration across application components.

Software Development for Autonomous Robotics

- Designed and implemented software modules in ROS for real-time pedestrian detection and navigation.
- Applied machine learning techniques to improve perception and decision-making.
- Documented system functionality and experimental results.

Artificial Intelligence

- Developed a neural network in Java following OOP principles.
- Implemented and tested classification algorithms, evaluating model performance.

Skills

Programming Languages: Java, Python, C/C++, C#, JavaScript, SQL, HTML/CSS
Testing: JUnit, Mockito
Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Thymeleaf, React
Tools & Workflow: Git, GitHub, Maven, Octave, Eclipse, VSCode, Ubuntu, LaTeX
Databases: MySQL
AI & Robotics: ROS, Gazebo, Machine Learning, NumPy, neural networks
Methodologies: Scrum, OOP, UML, requirements analysis, design patterns

Professional Experience

Academic Tutor 03/2024 – 03/2025 | Ioannina, Greece
Self-employed

- Provided one-to-one tutoring to university students in programming and computer science courses.
- Assisted students with coursework, programming projects and examination preparation.

Sales Assistant 07/2019 – Present | Ancient Olympia, Greece
Family-owned retail business

- Managed customer interactions and supported daily sales operations in a tourist retail environment during the summer tourist season.
- Assisted with product ordering and stock planning according to customer demand.

Languages

Greek

- Native

English

- ECCE B2 Level
